entering the solar system, where **Bokor**’s leader resides, and attacking him with an array of weapons specially designed to
kill him.*

chances Of Surviving Are Low.

i use to own this game on my Tablet and this game was also free to download from google play now it is on STEAM and you have to pay \$1.99USD just to play the same exact game that is for free from google play store, but anyway i thought why not it is on special for 99 cents so might as well buy it and i have to say this game is way more fun to play on a bigger screen and using a mouse. and also i would like add, it would be awesome if this game was in VR i would definitely buy the VR version of this game. SCUBA diving on LSD is clearly a bad idea, so it's a good thing that Blortasia gets you all of the benefits without the mortal danger. I love this experience. Wonderful to see VR explored beyond "shoot the zombie" games.. YES. H3VR meets Onward.

Not a lot of players atm. (in fact, I haven't played with anyone but myself yet), but when people scream REFUND and BAD REVIEW the moment they realize that early access actually means EARLY access, no wonder the player base doesn't grow.

H3VR has great weapon interactions, but the developer refuses to implement multiplayer.

Onward has multiplayer, but terrible weapon interactions (guns are glued to your hand, so you can't drop them, take out your sidearm with the other hand while your rifle is equipped, etc.).

Virtual Warfighter has both multiplayer and realistic weapon interaction. Just like H3VR, you can actually pull the pin of two grenades and throw them at the same time, or even pick up dead enemies' weapons and dual wield rifles, etc.

If people buy this, and don't just frantically refund it the moment they spot one bug, or can't find a game, this game will grow to be something awesome.

If you have any questions about the game, you can find me on the unofficial Discord server for the game

<https://discord.gg/vztu5d9K>. This game is really rough around the edges, all the english is broken and the controlls are really bad and unchangable, but its fun to build the bridges i guess. Meiner meinung nach ein richtig gutes Spiel. aber keider viel zu kurz

The worst game i have ever played

.... plz..... Waste of five dollars. It's sucks.

It just a flight plan that you can do in free flight much better.

Take off here and land there just it not like other missions have a story or something that separate missions from free flight.

Don't waste your money you can buy better things with this money.. Frustrating running text simulator with a really interesting story that I would love to explore more of.. Sadly the retro feeling could not comfort me over major issues this game has. The level design is awful, don't get me wrong, it's not graphics or anything, but you feel that by level 2 the devs just sprinkled the maps with pickups, it feels bored and rash. The super jump ability is useless, if you use it, it will hurt you. Firing weapons while jumping will fling you uncontrollably through the sky. Every gun is autoaiming. Ammo pool is minimal. It just is not a really good fps at all.... Amazing modeling tools, texturing is nice too. But we need sizing object, layers and a decent export tools with texturing.

Keep dooing the good job guys.. most deff worth 15\$ i had a blast playing it!. I really enjoyed this game and of the 7 wonders series, it is my favorite so far. It is highly addictive and really fun to try for the achievements. The only problem I have with it is that I've gotten them all now and want new ones to shoot for!

10/10. Not worth the price. Hell I got it with season pass and I still feel ripped off.. GOTY 2018 btw
